

Under the patronage of H.E. Prof. Dr. Hani Helal the Minister of Higher Education and Scientific Research in Egypt

**The First Arab Conference on Metrology
Will take Place in:**

Cairo 6 – 8 November 2007

Do You Want to Discover Egypt?

You must participate in the first Arab conference on metrology to find the opportunity to enjoy the ancient civilization with the most amazing monument in the world.

Venue

Cairo, Egypt Intercontinental Pyramids Park Resort

Intercontinental Pyramids Park Resort Cairo is an ultimate Place from which to explore Egypt's treasures, close to the fascinating Pyramids and Sphinx of Giza, the resort offers first class services in an atmosphere of relaxation and serenity.

About the conference:

- The existence of an accepted and internationally recognized measurement system is the cornerstone for the globalization of trade. This also could provide an easy way to exchange goods amongst the Arab states and overcome any obstacles that may prevent the ease of exportation. Consequently, it is essential to study the possibility of establishing an Arab organization concerned with Metrology similar to regional organizations.

Conference Language and Papers Presentations:

- Arabic & English with translation
- Extended abstracts from prospective authors should be e-mailed to the conference secretariat. The abstract should include: title, author (s) name (s), post (s), Institution, full address (postal, telephone, fax, e-mail).
- Participants will be notified in due time of the tentative program, field visits, pre and post conference guided tours, Exhibit fees, ... etc.

Conference Objectives:

- Establishing awareness of Metrology within Arab communities.
- Coordinating and integrating the capabilities of National Arab Metrological Institutions.
- Supporting confidence and credibility of calibration and measurement results among the Arab world
- Envisaging the establishment of Regional Metrology Organization for the Arab Countries.
- Establishing Mutual Recognition between Arab Metrological institutions with International recognition

Main Topics:

- Measurements and Calibration Capabilities available within the Arab world.
- Calibrations scope of and Confidence in measurements results.
- Role of Metrology in promotion of inter-Arab trade.
- Economic impact of Quality Systems, Conformity Assessment mechanisms, Accreditation and International recognition.
- Case Studies and gained experiences.
